

**FREE YOURSELF FROM A FACILITIES-BASED 511 SYSTEM  
AND FROM THE HIGH COST OF MAINTAINING IT.**

**511-in-a-box™**

 **INFORMATION LOGISTICS™**

**FINALLY, A COMPLETE CLOUD-BASED 511 SERVICE.**

511-in-a-box™ provides all the components of a traditional 511: web site, IVR and e-mail/text alerts. The system is integrated with WAZE for agencies partnering with WAZE, and can auto-post to agency social media. It also includes a state of the art mobile app: location-based, hands-free, eyes-free, interoperable and connected vehicle ready. All this at a fraction of the cost of traditional systems.

Low cost • Capacity On Demand SaaS • Cloud Based • Rapid Deployment • Customized

# FREE YOURSELF FROM A FACILITIES-BASED 511 SYSTEM AND FROM THE HIGH COST OF MAINTAINING IT.

01

Responsive design. The site automatically adjusts to accommodate the size limitations of the device being used. With responsive design, only one site is maintained, but the appearance of the site on a desktop PC will be very different from the appearance on a mobile device. This gives users the ease of learning a single navigation format that is available on both desktop and mobile devices.

02

An interactive web map. Also adaptive in nature, the interactive map will contain the categories of information requested by the Ministry.

03

Areas for text listings of alerts/information, text listings of cameras (images or streams), other links, and informational and help pages as requested by the agency. These other sections of the site are grouped and ordered in the navigation on PC and mobile devices so that the end user can easily navigate the site to find the information they need.

04

Integrated mobile app for hands-free, eyes free alerts and to help pilot your connected vehicle projects.
