

HAUL MONITOR™

COMPLIANCE • SAFETY • COMMUNICATIONS

HAUL MONITOR™ is a fully automated phone number that can be called by enforcement officers or commercial vehicle operators to validate oversize and overweight travel permits. Callers speak or enter a permit number, and HAUL MONITOR™ will respond back with the status and key permit details, including dates of travel, route, weight, height, and number of axles. The information can be customized based on available data from the transportation agency.

Verify permits as legitimate, accurate, and paid at any day or time, to prevent unsafe travel conditions.

Fully automated, voice assistant system provides accurate, official information directly from transportation agencies.

Commercial vehicle operators can verify that their permits are valid, especially during times of ad-hoc restrictions.
