## Live Streaming Emergency & Community Alerts

IRIS AlertNewsStream™ is an always-on digital alerting service that provides continuous, hands-free streaming of emergency updates and community advisories. Designed for local governments, this solution delivers real-time public safety alerts, severe weather warnings, emergency notifications, road closures and community notices through an automated online broadcast, ensuring citizens stay informed – without requiring an app or interaction.

## Key Features

- **Live Streaming Citizen Information** – 24/7 automated announcements on public safety, weather and civic updates.

- **Accessible Anytime, Anywhere** – Citizens simply press play on a website or mobile app or access it via a digital voice assistant (Alexa, Siri etc.)

- **Emergency & Weather Alerts** – Automatic streaming of severe weather warnings, evacuations and disaster response updates.

- **Localized or Regional Broadcasts** – Agencies can provide citywide, countywide or regional alerting options.

- **Seamless Digital Integration** – Easily embedded into city websites, emergency management platforms and public safety apps.

- **Civic & Community Notices** – Share special event information, public meeting announcements, transit updates and local government news.

## How It Works

- **Visit agency's Website or App or activate a digital voice assistant** – Click the streaming link to access IRIS AlertNewsStream™ at any time.

- **Choose a Region (if applicable) or simply say your request ("Alexa, play local emergency updates")** – Listen to city-specific or countywide updates.

- **Stay Informed with No Hassle** – Receive automated, hands-free public safety and community updates.

## Why Choose IRIS AlertNewsStream™ ?

- **Improves Public Safety** – Keeps residents informed during emergencies, severe weather and critical events.

- **Enhances Citizen Engagement** – Provides round-the-clock access to official local government updates.

- **Increases Accessibility** – Works on any device, no apps or downloads required.

- **Supports Emergency & Community Communications** – Complements text alerts, social media and reverse 911 systems.
