

When a car breaks down, and assistance is needed.

When someone is lost and needs your help.

When it is too dark for a driver to see mile markers, but needs help.

# IRIS Locate™

## Text message system to locate travelers in distress.

Finding the driver in trouble is one simple text message away.

IRIS Locate™ allows you to request a location point from the lost traveler. They click a link, and their phone's GPS location is plotted as a map point on your operator's console.

Save time by verifying disabled traveler locations to dispatch roadside assistance.

No app needed. No reading latitude and longitudes over the phone.
