

TRADITIONAL 511 CALL-IN - WITHOUT TRADITIONAL FACILITIES.

By using a cloud-based system and native VoIP telephony, this in-a-box component leverages current technologies to offer the solution to your IVR traveler alert system needs – at significant savings.

Traditional IVR

TrafficPhone IVR Services

Provision to maximum expected usage

Expand (and contract) as needed

Size limited by initial provisioning

Dynamic allocation of more resources

Physical ports

Virtual VoIP

Cumbersome floodgate recordings

Simple remote scheduling & management of floodgates

Acquire phone lines

Apply software licenses

Housed in co-location facility

Housed in cloud – multiple geographic locations

High cost of concatenated human speech

Low cost text-to-voice technology
