

AUTOMATED IPAWS NOTIFICATIONS

iLOG Alerts automatically notifies you when emergency alerts are activated through FEMA's Integrated Public Alert and Warning System (IPAWS) in areas that are important to you and your agency.

Receive automatic email notifications when IPAWS alerts are activated. Full alert details give you an immediate overview of the message to the public.

Choose the area and types of alerts that will be emailed to you with a simple interface.

View a live map of active IPAWS alerts across the US. Make the map full screen for use in your emergency operations center.

Search archived IPAWS alerts to research past activations, and create custom reports to track alert activity.
